

CONTENTS FOR VOL. 35, NUMBER 4/2007
VIETNAM JOURNAL OF MATHEMATICS

Singular Difference Equations: An Overview Pham Ky Anh, Nguyen Huu Du, and Le Cong Loi	339
Admissible Transformations and Assignment Problems Rainer E. Burkard	373
Models and Algorithms for Robust PERT Scheduling with Time- dependent Task Durations Michel Minoux	387
Comparison of Search Strategies of Branch and Bound Algorithm for Concave Minimization Problems Under Linear Constraints Hiroshi Konno, Kazuo Izumi, and Rei Yamamoto	399
A Gagliardo-Nirenberg Inequality for Orlicz and Lorentz Spaces on \mathbb{R}_+^n Ha Huy Bang and Mai Thi Thu	415
Robust Stability and Transient Behaviour of Positive Linear Systems D. Hinrichsen and E. Plischke	429
A Simplicial Algorithm for Concave Minimization and Its Performance as a Heuristic Tool Takahito Kuno and Yoshiyuki Shiguro	463
Convex Conjugation and Duality for the Solutions of a Functional Equation J.-E. Martínez-Legaz	481
Finite Semigroups with Infinite Product and Languages of Infinite Words Phan Trung Huy, Nguyen Quy Khang, and Do Long Van	495
On the Extremal Structure of an OSPF Related Cone Peter Broström and Kaj Holmberg	507
On Branch-and-Bound Algorithms for Global Optimal Solutions to Mathematical Programs with Affine Equilibrium Constraints Le Dung Muu and Nguyen Van Quy	523
A Homogeneous Model for Mixed Complementarity Problems over Symmetric Cones Yedong Lin and Akiko Yoshise	541
The Existence of ε -Solutions to General Quasiequilibrium Problems N. X. Hai and P. Q. Khanh	563
Contents for Volume 35	573
