

Contents for Volume 39

Alexei A. Panchishkin, see Siegfried Boecherer	
Alfred Menezes, see Neal Koblitz	
Archana Khurana, An algorithm for solving quadratic fractional program with linear homogeneous constraints	391
A. V. Geramita, Hilbert functions of double point schemes in \mathbb{P}^2	327
Cemil Tunc, On the stability and boundedness of solutions of a class of Liénard equations with multiple deviating arguments	177
Changhong Zhao, On the asymptotic behavior of solutions for a third-order nonlinear differential equation	71
Changwen Li, On SS-semipermutable subgroups of finite groups	125
Claude Levesque, Some remarks on diophantine equations and diophantine approximation	343
Dang Quang A, Domain decomposition method for elliptic interface problems	485
Do Long Van, On codes defined by binary relations part I: embedding problem	159
Do Long Van, On codes defined by binary relations part II: characterizations and maximality	425
H. Fallahgoul, see S. M. Hashemiparast	
Huynh The Phung, A characterization of partition systems of \mathbb{R}^n and application	79
Huy Tài Hà, see A. V. Geramita	
Igor E. Shparlinski, see Neal Koblitz	
Kangkang Wang, A type of Markov approximation of random fields on a homogeneous tree and a class of small deviation theorems	1
Kangkang Wang, A kind of random deviation theorems for stochastic sequence on random selection systems and laplace transforms	405
Kieu Van Hung, see Do Long Van	
Kieu Van Hung, see Do Long Van	

Le Dung Muu, Smooth optimization algorithms for optimizing over the pareto efficient set and their applications to minmax flow problems	31
Le Mau Hai, The Subextension Problem for the Class \mathcal{E}^ψ	251
Le Quang Thuy, see Le Dung Muu	
Liu Lanzhe, see Zhu Yusen	
Michel Waldschmidt, see Claude Levesque	
Mingxing Zhu, see Kangkang Wang	
M. Sabzevari, see S. M. Hashemiparast	
Neal Koblitz, Discrete logarithms, diffie-hellman, and reductions	267
Nessim Sibony, see Tien-Cuong Dinh	
Nguyen Thi Quynh Anh, see Nguyen Xuan Tan	
Nguyen Van Ngoc, Vector-pseudodifferential operators related to orthogonal expansions of generalized functions and applications to systems of dual series equations	443
Nguyen Xuan Tan, Generalized quasi-equilibrium problems of type II and their applications	191
Nguyen Xuan Thao, see Trinh Tuan	
Pham Minh Thong, see Trinh Tuan Anh	
Phan Hoàng Chơn, Monomials basis of the Araki-Kudo-Dyer-Lashof algebra	19
Pulak Sahoo, Meromorphic functions that share a nonzero polynomial with finite weight	49
Qiyuan Zhou, see Changhong Zhao	
Rakesh Kumar, Totally contact umbilical GCR -lightlike submanifolds indefinite sasakian manifolds	91
R. K. Nagaich, see Rakesh Kumar	
Siegfried Boecherer, Higher twists and higher Gauss sums	309
S. M. Hashemiparast, Improving the solution of nonlinear volterra integral equations using rationalized haar s-functions	145
S. R. Arora, see Archana Khurana	
Sumit Mohinta, Well-posedness of common fixed point theorems for three and four mappings under strict contractive conditions in fuzzy metric spaces	237
Tang Van Long, see Le Mau Hai	
Thomas C. Hales, On the reinhardt conjecture	287
Tien-Cuong Dinh, Equidistribution of varieties for endomorphisms of projective	369
T. K. Samanta, see Sumit Mohinta	
Tong Thanh Trung, see Trinh Tuan Anh	
Trinh Tuan, A new polyconvolution and its application to solving a class of toeplitz plus hankel integral equations and systems of intergral equations	217

Trinh Tuan Anh, On the asymptotic behavior of solutions and positive almost periodic solution for predator-prey system with the holling type II functional response	105
Trinh Tuan Anh, Extinction of species in discrete models of Lotka-Volterra type with infinite delay,	465
Truong Ha Hai, see Dang Quang A	
Varun Jain, see Rakesh Kumar	
Vu Vinh Quang, see Dang Quang A	
X. F. Liu, Strong vonvergence theorems for a finite family of relatively nonexpansive mappings	63
Zheng Liu, Some sharp modified simpson type inequalities and applications	135
Zhu Yusen, Weighted sharp boundedness for multilinear commutators of singular integral on spaces of homogeneous type	381
